

RE-TEST Hands-On TEST 01 (SEC 001)- SUMMER 2026

DATE: 28th July. 2026

Marks/Weight: 50/25%

Time: 6.30 pm to 8.30 pm

Be sure to read the following general instructions carefully:

- This hands-on test **must be completed individually** by all the students. **DO NOT** give your solution to others, otherwise there will be serious consequences. You are not allowed to share, communicate, e-mail, text during the test. See College Academic Policy
- Read the project **naming and submission guidelines** as explained in the following sections
- You should **provide the runtime screenshots** of your solution and **submit the project and screenshots through the Test01 link on Luminate**.

IDE: Android Studio – Meerkat Version and Kotlin Jetpack Compose

Android Project Naming rules:

1. You must name your **Android Studio project** according to the following rules:
YourFullName_COMP304_001_Test01
Example: NickAdam_COMP304-001_Test01
2. Use minSdkVersion **36** and targetSdkVersion **36 or higher**
3. **Main activity** should be named: YourFirstNameActivity, for example: NickActivity.
4. The **second activity** should be named YourLastNameActivity, for example: AdamActivity
5. Must provide your **student's name and number as a comment** at the top of each activity

Submission rules:

1. Archive your project in a **zip file (compressed file formats such as .rar, .7z etc NOT allowed)** named according to the following rule: **YourFullName_COMP304-001_Test01.zip**
Example: **NickAdam_COMP304-001_Test01.zip**
2. Upload the project through the Hands-On Test 1 link on **Luminate**.

Exercise #1:

Develop an Android application that demonstrates understanding of basic Android development using Kotlin, Jetpack Compose, Navigation, Event Handling, Material Design 3 and various composables.

Description: Create an Android app named "**PersonalContacts**" that allows users to manage their contacts. The app should include the following features:

1. **Main Activity:**
 - o Initially, when app starts, it displays a label (**MY PERSONAL CONTACTS**) and an image button (choose an image of your choice). *[5 marks]*
 - o When the user clicks on the image button, navigate to the second activity.
2. **Second Activity:**

Note: If first letter of your first name lies between A and H, then you need to do the following:

- Allows users to add new contact with text fields for ID 4 digits long – 1001-9999), name, cell phone (10 digits long), and email, contact type (as radio button – Business or Work) and Favorite as drop down (Preferred, Important, Normal)

Note: If first letter of your first name lies between I and Z, then you need to do the following:

- Allows users to add new contact with text fields for ID (3 digits long – 101-999), name, cell phone (10 digits long), and email, contact type (as drop down – Family, Personal, Relative) and Favorite as Radio button (Yes or No)

Following instructions apply to all.

- Displays a Snackbar/Toast with the entered contact details upon clicking the "ADD NEW CONTACT" floating action button. *[5 marks]*
- Displays a list of all added contacts using a LazyColumn. *[10 marks]*

Requirements:

- 1. Main Activity (UI and Event Handling):**
 - Use Jetpack Compose for the UI components.
 - Implement navigation to the second activity.
- 2. Second Activity (UI, Event Handling, Navigation)**
 - Use Jetpack Compose for UI components.
 - Implement form fields for entering contact details. **Validations must be implemented.**
 - Implement checkboxes or radio buttons for contact type selection.
 - Display the entered contact details in a Snackbar/Toast.
 - Use LazyColumn to display the list of added contacts.

Evaluation:

Item	Percentage of Total Mark	Details
Functionality:	85%	
- Main Activity (UI and Event Handling)	20%	Ensure the main activity displays correctly and handles navigation.
- Second Activity (UI, Event Handling, Navigation)	40%	Correct implementation of UI, form handling, and ViewModel integration.
- Displaying contact list using LazyColumn	20%	Correct implementation of LazyColumn to display contacts.
- Use of Material Design 3 components	5%	Ensure Material Design 3 principles are applied.
Friendliness:	10%	
- Alignments of UI controls	5%	UI controls should be properly aligned and organized.

Item	Percentage of Total Mark	Details
- Friendly I/O	5%	The app should provide a user-friendly interface.
Comments, Correct Naming of Variables, Methods, Classes, etc.	5%	Code should be well-documented with appropriate comments and follow proper naming conventions.
Total	100%
